

ChatNT Dataset Streaming Scan on DGX Spark GB10

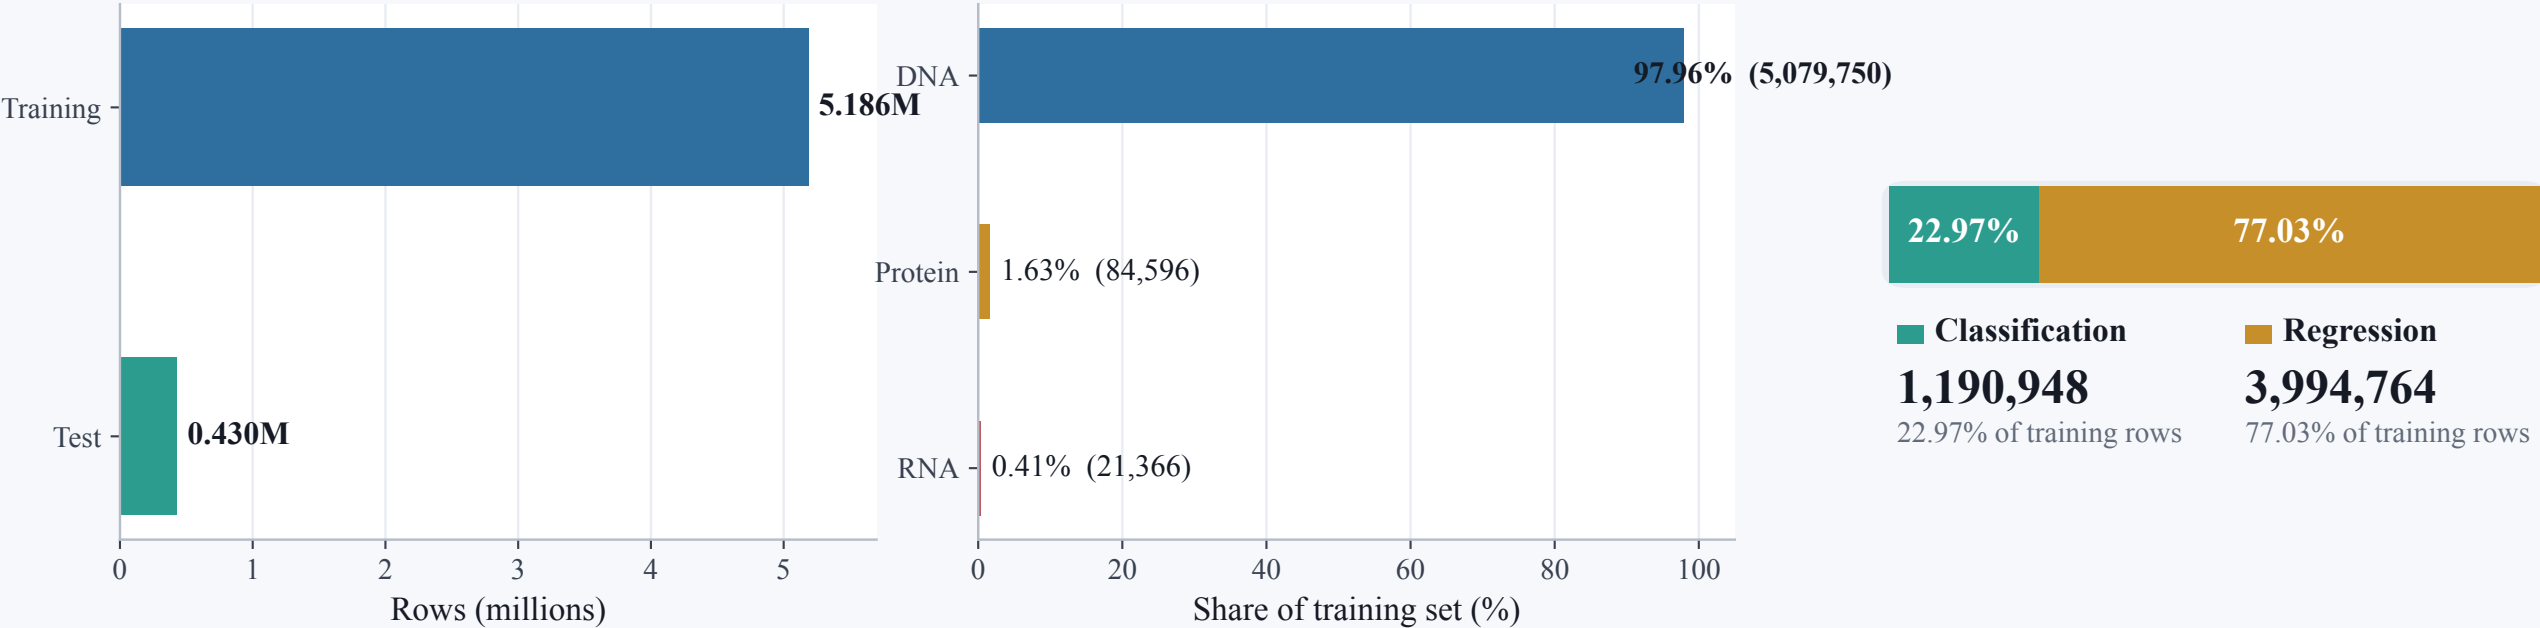

Hugging Face mirror download | 8 training parquet shards + 1 test parquet shard | PyArrow streaming scan with 65,536-row batches

Dataset Scale

Training Modalities

Task Objective Split

Reproducibility Summary

The scan recovered 5,185,712 training rows and 429,597 test rows, matching the dataset card scale. Training data spans 35 tasks across 13 categories, with DNA samples dominating the corpus and regression objectives forming the majority of labeled examples.

Pipeline: Hugging Face mirror > parquet shard download > PyArrow streaming scan > data-card consistency check
